Drain #1 _____

Drain #2 _____

Drain #3 _____

Drain #4 _____

Start tonight—2 times daily (AM/PM). Open binder. Start at pubic area using an alcohol gauze; strip down to bulb two times each. Open bulb. Record amount; empty. Squeeze bulb and replace drain plug (bulb should remain compressed—on suction). Put Bacitracin ointment on each drain site and belly button. Replace pads and put abdominal binder back on smoothed out, and below breast creases.
